What is an Open Badge?

Open Badges

ANATOMY OF AN OPEN BADGE

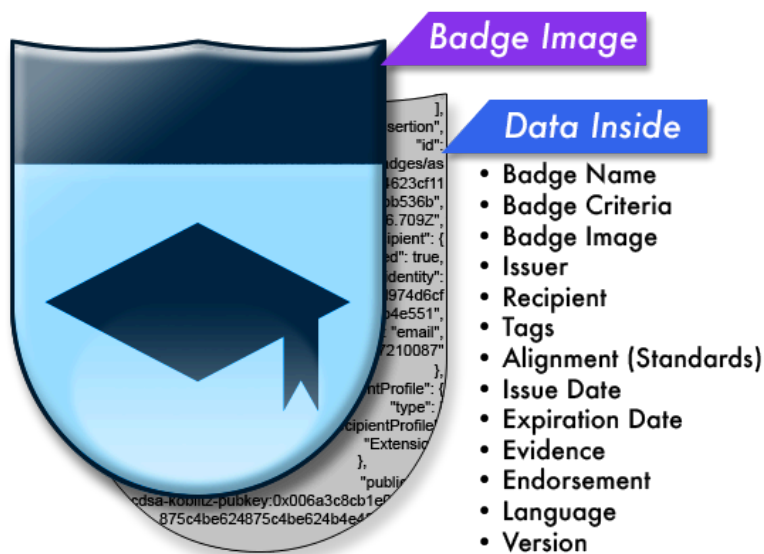

Figure 1 – Anatomy of an Open Badge

"Open Badges are verifiable, portable digital badges with embedded metadata about skills and achievements. They comply with the Open Badges Specification and are shareable across the web.

Each Open Badge is associated with an image and information about the badge, its recipient, the issuer, and any supporting evidence. All this information may be packaged within a badge image file that can be displayed via online CVs and social networks. Thousands of organizations across the world issue badges in accordance with the [Open Badges Specification](#), from non-profits to major employers to educational institutions at all levels."

- openbadges.org

For more details visit [the Open Badges website](#).

Your IoC Badges

Badge recipients will be able to login to our website and view their IoC badge portfolio. Here they can view the details of any of their badges in our friendly viewer page (see figure 5) and download their badges:

We use essential cookies to handle sessions and logins, and Matomo Analytics cookies to gather data on how you use this site. This data is extremely valuable for our research and helps us improve our analysis. Note: all Analytics data remains on our own local Matomo server.

Badge Validation

We have created a web page where anyone can come and validate one of our IoC badges. So if you have received a badge you can give it to, say a prospective employer, and they can come to our site and validate that it is a valid IoC badge that was issued to you. They must have access to the badge file and they must have separately obtained and confirmed the email address used for the recipient of the badge belongs to you.

We use essential cookies to handle sessions and logins, and Matomo Analytics cookies to gather data on how you use this site. This data is extremely valuable for our research and helps us improve our analysis. Note: all Analytics data remains on our own local Matomo server.

Validate a Badge

To validate a badge, select a .png file of a badge, enter the recipient's email address and press the validate button.

The answer will appear in the results panel, a tick for a valid badge, a cross for an invalid badge. Press show details for more detailed information.

Select a badge file *

Enter recipient's email *

Badge Uses

There are many Open Badge services in existence for issuing, storing and sharing Open Badges which you could explore and engage with. But the most common use for your badges will be to share them on social media, especially somewhere like LinkedIn.

So in this section we will explain how you can share you Institute of Coding badges on LinkedIn.

Share your badges on LinkedIn

1. Go to your badge portfolio and click the **view** icon against the badge you want to share.

Home > My Badges

My Badges

LinkedIn [Share your badges on LinkedIn](#)

Third-Party Sites: Existing external badging services will require you to use the 'Traditionally Verified' badge version, which you can download below.

Solid Personal Storage: The Open University is a Solid Pod Provider (solid.open.ac.uk). For More information about Solid visit SolidProject.org

Note: You have taken control of your solid pod. You have granted permission for IoC to keep adding your issued badges to your pod.
Please click the copy button against a badge for any badges not in your pod, that you wish to add.

Show entries Search:

Image	Issuer	Issued	Title	View	Blockchain Verified	Traditionally Verified	Solid
	Institute of Coding	6 Sep 2023	Use #IoCConference 2020 on social media				
	Institute of Coding	26 Apr 2023	Follow the Institute of Coding on Social Media
